Stream Measurements

A.   W-

     D-   / / / / / / / / / / =

     V-   / / / / / / / / / / =

B.   W-

     D-   / / / / / / / / / / =

     V-   / / / / / / / / / / =

C.   W-

     D-   / / / / / / / / / / =

     V-   / / / / / / / / / / =

AVERAGE CFS=

Width-divide width in inches by 12-inches, to get width in feet.

Depth-add all measurements up and divide by 10, to get average depth in feet.

Velocity-add all measurements up, then divide by 10, to get average velocity.

    then multiply (WDV) totals to get average flow.

    add all flow totals (A+B+C), then divide by 3, to get average CFS.
